# ST. MARY COLLEGE

---

St. Mary College is a boarding and day college for young men and boys. It is empowered by the Assembly of the State of Ohio to confer degrees. The extensive grounds of over 50 acres are located in South Park, a remarkably picturesque spot within the city of Dayton, overlooking the Miami Valley. St. Mary has all that a college of today calls for, viz., dormitory building with private rooms; halls, modern in every detail; complete equipment for all departments (laboratories, libraries, museums, etc.); a picturesque park, a natorium, a gymnasium and auditorium, club rooms, and campuses of over ten acres to accommodate the entire student body.

## DEPARTMENTS

There are four distinct Departments of Studies at St. Mary: the Collegiate Department, comprising the College of Arts, Letters, Science and Engineering, the High School or Preparatory Department, the Business Department and the Elementary Department. The studies in all Departments, excepting the Collegiate, are prescribed and not elective.

## COLLEGIATE DEPARTMENT

### College of Arts, Letters, and Science

The studies of the Collegiate Department are divided into four groups, leading to the degrees Bachelor of Arts, Bachelor of Letters, Bachelor of Science, and Bachelor of Engineering. The selection of studies is made with the assistance of an Advisory Board and with the approval of the Prefect of Studies. Philosophy and English are considered fundamental studies for all degrees in the College of Arts, Letters, and Science. Latin and Greek are characteristic studies for students wishing to obtain the degree of Bachelor of Arts. Latin, History, and Modern Languages are characteristic studies for candidates aspiring to the degree of Bachelor of Letters.

Candidates desiring a course in General Science may arrange for a course with the Prefect of Studies. An extensive study of mathematics constitutes an essential feature. Upon the successful completion of the course, the degree of Bachelor of Science is awarded.

Department of Physics

### College of Engineering

The College of Engineering was inaugurated in September, 1910, at the urgent request of Alumni and friends of St. Mary.

No effort is spared to acquaint the student body thoroughly with the fundamental principles and to give them a deep insight into the theoretical analysis of engineering problems. While emphasis is laid on fundamental theory, continual attention

**Department of Chemistry**

is paid to the solution of practical problems for the purpose of imbedding principles and illustrating the lines of their general industrial application. At the same time students are trained to habits of initiative and industry, and will thus be well prepared to adapt themselves readily to actual conditions and requirements, and to grapple with new problems that from time to time confront the professional engineer.

Lecture and text-book courses are accompanied throughout by quantitative work in well-equipped laboratories.

Frequent visits are made to accessible engineering establishments to make the student thoroughly conversant with the trend of current engineering practice. For such purpose Dayton offers exceptional facilities owing to the great number and variety of engineering plants located in the city and vicinity. Lectures by engineers in active service will help to keep the student in touch with professional work.

Upon the successful completion of one of the Engineering Courses, the degree of Bachelor of Mechanical, Electrical, Chemical or Civil Engineering is awarded.

### **HIGH SCHOOL DEPARTMENT**

St. Mary has a four years' High School or Preparatory Course that is accredited to Case School of Applied Science, as well as to the North Central Association of Colleges and Secondary Schools, which comprises the universities of Michigan, In-

diana, Illinois, and Ohio, and in general the universities of the Middle West.

The four years' course is prescribed, not elective, and corresponds to the college preparatory course recognized by the leading educators as the only logical outline of studies for students who intend to take up higher studies. A diploma from the high school department of St. Mary or any of the accredited high schools of the North Central Association admits to the freshman year of the College of Arts, Letters, Science, or Engineering.

Equipment of Business Department

## **BUSINESS DEPARTMENT**

Students desiring to fit themselves for office work, and for business in general, are accommodated with a two years' course in the business department. A typewriter is furnished every student, and the classes are taught the use and the manipulation of adding machines, and are given thorough practice to familiarize themselves with the many manifold and duplicating processes. Lectures by leading business men of the city take place weekly, and form an instructive and interesting feature of the two years' course.

## **ELEMENTARY DEPARTMENT**

### **Nazareth Hall**

The Resident and non-Resident Students of the Elementary Grades receive the care and attention suitable to their age in Nazareth Hall, which has been remodeled for their accommodation.

**S. M. C. Band and Orchestra**

## **MUSIC DEPARTMENT**

The Music Department of the College is intended primarily to accommodate those who wish to pursue the study of music for its cultural advantages and as a refined accomplishment.

The students of the Department of Music are encouraged to acquire the proficiency requisite for membership in the Student Orchestra, S. M. C. Orchestra, and S. M. C. Band. These musical organizations give recitals and concerts in the course of the year and furnish the music at all dramatic and athletic events. They have been well received for years and have earned the continued favor of large audiences by their exceptional rendition of classical as well as popular programs.

Voice culture is fostered in all departments of the College. Sight singing is taught to the younger students who are encouraged to become members of the S. M. C. Choir of select voices. Students of the Collegiate Department are eligible to membership in the S. M. C. Glee Club, a popular organization among the young men of the college.

## **S. M. C. DRAMATIC CLUB**

The S. M. C. Dramatic Club was organized for the purpose of fostering and cultivating a taste for elocution, oratory, and the drama. Under its auspices entertainments are given and elocution and oratorical contests are held.

## S. M. C. EXPONENT

The Exponent, a monthly magazine edited and published by the undergraduates, is the literary organ of the student body. As its name indicates, The Exponent is an index of student life at St. Mary College in all its varied phases. Each monthly issue contains representative work of the students in the departments of philosophic, scientific, and literary study in which their mental activity is exercised, and a detailed chronicle of the events of college life, which always proves of special interest to the wide circle of parents, relatives, alumni, and friends of the students.

Club Rooms

## ATHLETICS

Few colleges in the country can compare with St. Mary in the spacious accommodations both for indoor and outdoor athletics. Four large club rooms, equipped with gymnastic apparatus, basket ball courts, bowling alleys, billiard and pool tables, and a variety of games adapted to the age of the student, are used during inclement weather and during the winter season. The basket ball court in the gymnasium for the intercollegiate games of the Varsity and High School Teams is one of the largest in the State.

30112 105661471

### Campuses

The six spacious campuses accommodate the entire student body. A quarter-mile cinder path affords exceptional opportunities for the development of track teams.

Coaches are in charge of the different departments of athletics. By the interest they have stimulated these past years, St. Mary has met and defeated the best teams in the State. Physical exercise and military drill are given to the students by an experienced physical director.

The new Dormitory Building, St. Joseph Hall, opened in 1911, contains private rooms equipped with every convenience—electric light, steam heat, hot and cold water, and pure spring water. Bath rooms are installed on every floor. No expense was spared to make the rooms as comfortable and home-like as possible.
